Purpose

This document aims to review the Mano Cruise website to ensure a comfortable user experience and an easy and simple vacation booking process.

Application Overview

The Mano Cruise website is one of the key tools for booking cruises on the ship "Crown Iris" which is owned by the Mano Maritime company.

The website contains vacation packages available for booking and important information for the customer, such as Sailing schedule, Special deals, Shore tours, and more.
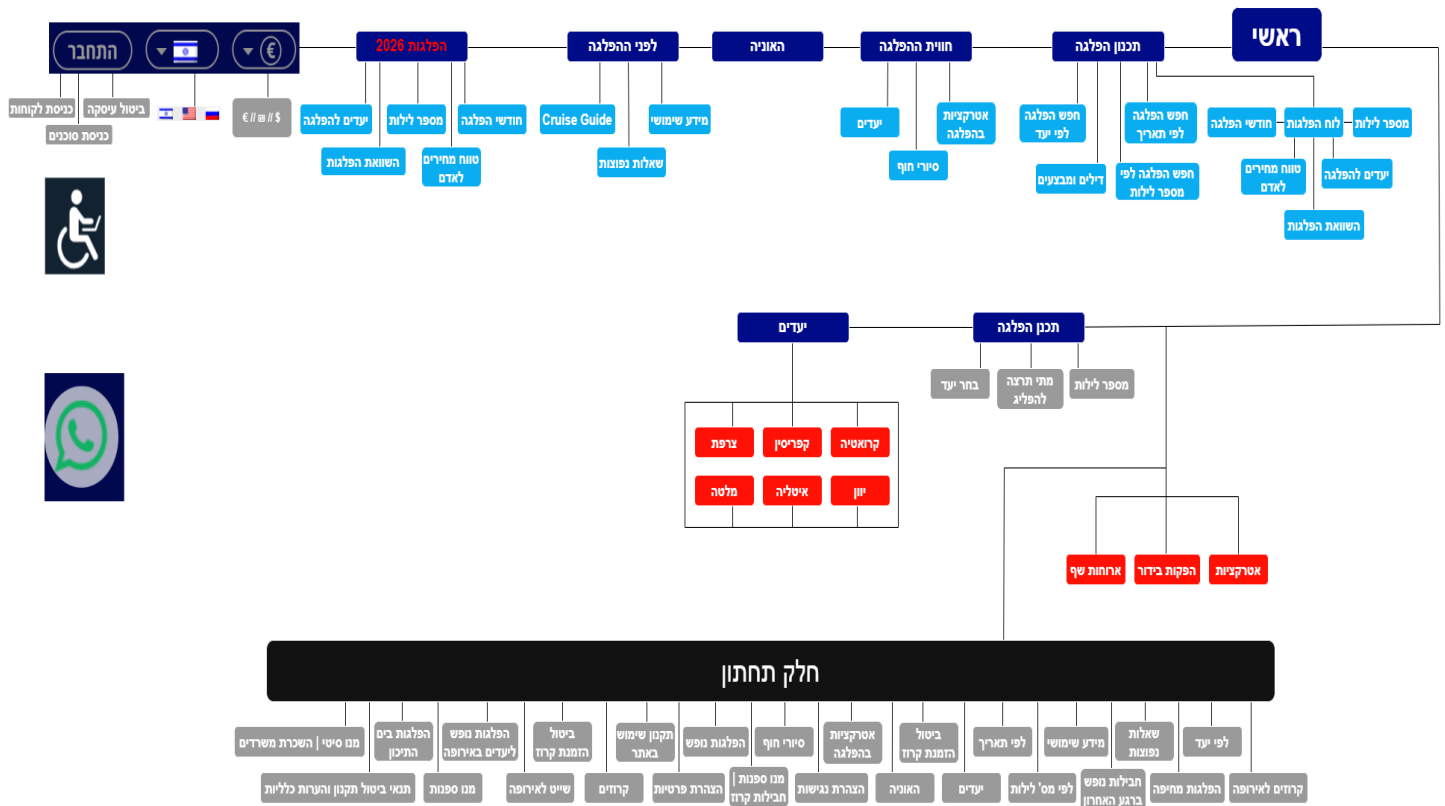

The website includes a wealth of information about cruise offers and other important details for clients, helping them find the perfect cruise they have always wanted.

Testing Scope

The tests will include:

1. <mark>**Functional Testing**</mark> to ensure that all buttons and functional elements perform their tasks correctly and lead to the appropriate pages they are supposed to be linked to as a Positive test, Also Negative tests as well, to ensure that the website does not perform actions it is not supposed to perform.

2. <mark>**GUI Testing**</mark> will also be conducted to ensure that the website is easy to use, pleasant to interact with, and free of graphical bugs that could affect the user experience.

3. <mark>**Performance Testing**</mark> will be conducted to ensure that the website loads quickly and responds efficiently without unnecessary delays or lags.

4. <mark>**Compatibility Testing**</mark> will be performed to ensure that the website is optimized for different screen resolutions, device types, and various web browsers.

5. <mark>**Localization Testing**</mark> will be performed to ensure that the website can be used in different language as existing in it.

6. <mark>**Usability Testing**</mark> will be performed to ensure that the website is easy and comfortable to use and find the relevant items.

Conclusion

Based on the functional tests conducted on the Mano Cruise website, approximately 13 bugs have been found so far.
Most of the bugs are of medium severity.
The identified bugs have no direct impact on the website's functionality or its core services, such as searching for cruises and booking cruises.
The site still operates well and can be used without any restrictions.

☑ **Subject to the test results, I recommend continuing to operate the website.**

Recommendations

Here are the main recommendations for improving the website based on what has been tested so far:

1. Check and fix all the codes related to all the filter areas options in the website.

2. Check and fix the code for sorting options in all the relevant pages in the website.

3. Fix the Accessibility page and the path to that page.

4. Fix the currency change code to allow the currency to update according to the selection on all relevant pages.

5. Check some duplicates directions in some buttons in the footer.

6. Consider to arrange the cruise page to include a limit of cruises in page.
